Suggestions for using AK19.2 Feedstuff Identification

The presentations on this CD-ROM are composed in Microsoft PowerPoint and should run equally well on PCs or Macintosh machines. For information about using PowerPoint presentations, refer to Help in your PowerPoint program.

PowerPoint Viewer
If you do not have PowerPoint on your machine, a freely distributed version of PowerPoint viewer is on the CD-ROM, in the folder called POWERPOINT VIEWER. It allows users to open and view PowerPoint presentations.

With this release, the Microsoft PowerPoint® Viewer 97 supports files created in versions prior to PowerPoint XP®. This viewer allows PowerPoint users to share presentations with users who do not have PowerPoint installed on their computers. Users can view and print presentations, but cannot edit them within the PowerPoint Viewer.

The PowerPoint Viewer supports all PowerPoint 97 and PowerPoint 95 features. You can use it to view files created in both Windows® and PowerPoint for the Macintosh.

Note: This version of PowerPoint Viewer is for Windows® 95, 98, and 2000 and Windows NT®, Windows ME®, and Windows XP® operating systems only.

For additional information, or to check for a more recent version on the viewer, go to www.microsoft.com.

Installation of Viewer
Double click on the PPView97.exe program file in the PowerPoint Viewer folder of the CD-ROM. Follow the instructions on the screen to complete the installation.
Table of Contents
In order for the user to navigate AK19.2, the Navigation Slide file should be opened. The slide show will start automatically. The links on the Main Menu slide will lead to the following files.
Main Menu. This slide is the main menu with the links to each session listed below. The user can go to each link by clicking on the text box of the selected session. It also has a link to the acknowledgements slide, Readme, and a quit button to stop running the slide show.

Sessions

Educational Session. This link leads to the Feedstuffs, Glossary, and Tables presentations.

The Feedstuffs presentation contains information about the feed samples in the kit. The information includes source, processing, nutritional composition, and common diets. The Feedstuffs presentation is designed for instruction. Each feed product is hyperlinked for a direct link or the action buttons at the bottom of the screen can be used for navigation.

The Glossary presentation contains terms commonly used when discussing feeds and animal nutrition. Student handouts for the terms can be printed in Teaching Resources link. Tests have also been created and can be printed in the same location.

The Tables presentation contains advanced information on the nutritional and chemical makeup of each feed sample included in the kit. The tables can also be linked to in the Feedstuffs presentation by clicking on the “Complete Table” text box. The back arrow should be clicked to return to the previous slide viewed.
Photo Session. This link leads to a Photo Session of each Feed Ingredient and Processed Feed included in the kit. This session includes only an image and name of the feed ingredient or processed feed in the kit. Each feed product is hyperlinked for a direct link or the action buttons at the bottom of the screen can be used for navigation. This presentation is designed to use for reviewing the appearance of each product. Click the “Start” button and then select either “Feed Ingredients” or “Processed Feeds” to begin.

Quiz Session. This link leads to a Quiz Session of each Feed Ingredient in the kit. It includes only the image of each feed ingredient without the name. It is designed to use for quizzing the appearance of each product. The user should click “Enable Macros” when prompted to begin the presentation. A link to the quiz key is included on the first slide of the quiz session. The key can be printed by clicking on the Block I in the lower right-hand corner of the screen, if the user clicked “Enable Macros” when prompted.

Interactive Session. This link leads to an Interactive Session of each Feed Ingredient and Processed Feed in the kit. It is designed for self quizzing by selecting the correct image from a choice of three. More information on how the Interactive Session is designed can be found on the second slide of the presentation.

Teaching Resources. This link leads to the forms listed below. Specific printing information is listed with each form. When printing forms the user should click the “Enable Macros” button when prompted.

Student Handouts. These forms contain a summary of the information presented in the “Glossary” presentation. They are designed for students to record notes from the session. To print the slides as handouts, it is recommended to open the file titled “student” from the CD-ROM and select Print Handouts in the print menu. For assistance refer to the Help menu of PowerPoint.
Student Term Tests. These forms contain printable tests and keys for terms from the glossary. The forms are designed to be printed and distributed to students for a pre- and/or post-evaluation. To print all the tests and keys while running the presentation, simply click on the Block I in the lower right-hand corner of the first page and the forms will print to the user’s default printer. The user may have to click the “Scale and Print” button if prompted. The user may have to click “Enable Macros” if prompted. To return to the main menu, the user should hit the escape key.
