Types of Housing to Address Local Needs .................................... 15

Barriers to Providing Sufficient Housing in Rural Communities ....... 16
  Limited Availability of Experienced Contractors and Skilled Labor ... 17

Dealing Effectively with Public Issues and Opposition .................. 18
  Dealing with NIMBYism ............................................................. 18

## Basic Steps in Real Estate Development ..................................... 19

### Phase I. Preconstruction .......................................................... 19

  Step 1. Convene a steering group or housing coalition .................. 19

  Step 2. Review, develop, and compare apparent needs to
  organization’s mission and goals ............................................... 20

  Step 3. Conduct assessment and analyze housing need ................. 20
    Identifying Needs ..................................................................... 20

  Step 4. Develop a housing strategy ............................................ 21
    Competitive Inventory Form .................................................... 22

  Step 5. Review roles of the partners/collaborators involved in the project .... 22

  Step 6. Prepare design concept ................................................ 22

### Phase II. Project Feasibility ....................................................... 23

  Step 1. Organize the development team ...................................... 23

  Finding a Developer .................................................................... 23

  Step 2. Conduct the site search and select preliminary choices ......... 23

  Step 3. Conduct informal environmental and regulatory review .......... 23

  Step 4. Prepare detailed design and initial cost estimates ............... 24
Step 5. Perform initial sources and uses of funds analysis ........................................... 24
  Gap Financing ........................................................................................................... 24
Step 6. Gain site control with conditions .................................................................... 24

Phase III. Project Financing ......................................................................................... 25
Step 1. Develop the project finance plan ..................................................................... 25
Step 2. Hire appropriate consultants, if necessary .................................................... 26
  How to Hire a Consultant ..................................................................................... 27
Step 3. Initiate funding applications .......................................................................... 27
  Income Eligibility .................................................................................................. 27
Step 4. Secure commitments from partners, tenants .................................................. 27
Step 5. Revise schematic building plans and update cost estimates ......................... 28
Step 6. Prepare funding and loan forms .................................................................... 28
Step 7. Draft marketing and management plan .......................................................... 28
Step 8. Determine roles and method of construction management ......................... 28
Step 9. Compare approved project to development concept .................................... 28
Step 10. Negotiate and secure project financing ....................................................... 29

Phase IV. Project Construction ..................................................................................... 29
Step 1. Complete design drawings and estimates ....................................................... 29
Step 2. Submit plans, request scheduling for approvals ............................................. 29
Step 3. Make a detailed construction budget ............................................................. 29
Step 4. Qualify contractors and develop bid list ......................................................... 29
Step 5. Purchase the property ................................................................................. 29
Step 6. Initiate and complete bidding requirements ................................................ 29
Step 7. Finalize construction estimates and project budget ....................................... 30
Step 8. Develop a construction schedule .................................................................. 30
Step 9. Close on loans and grants ........................................................................... 30
Step 10. Obtain building permit .............................................................................. 30
Step 11. Hold preconstruction meeting, commence construction ......................... 30
Step 12. Initiate marketing ....................................................................................... 30
Step 13. Monitor progress or subcontractors throughout project ............................ 30
Step 14. Issue final inspection and certificate of substantial completion ............... 30

Phase V. Project Operations ......................................................................................... 31
Step 1. Solicit and select property manager or sales representative ....................... 31
Step 2. Hold open house/community relations event ................................................ 31
Step 3. Select tenants or offer sales .......................................................................... 31
  Legal Issues of Fair Housing .............................................................................. 31
Landlord-Tenant Rights and Responsibilities ........................................ 31

Step 4. Initiate construction closeout .................................................. 32

Step 5. Hire a site manager .................................................................. 32

Step 6. Oversee move in ...................................................................... 32

Step 7. Conduct equipment warranty inspections ............................... 32

Phase VI. Postoccupancy Evaluation ................................................... 32
